

# ALEKSANDRA BOBROVICH

FRONTEND DEVELOPER JUNIOR

## ABOUT ME

The desire to constantly develop and grow led me to study front-end development. I will be glad to get the opportunity to do an internship or get a job as a junior front-end developer. I am very motivated to improve my skills on real interesting projects, and at the moment, I continue to improve and expand my knowledge (I take training in RSSchool, and I am in the process of developing my application using basic knowledge of Node.js/Express/PostgreSQL/React. I also improve my English language skills through tutoring.

## HARD SKILLS

- HTML5/CSS3/SASS
- Java Script /TypeScript
- React
- Redux/Redux-Thunk
- REST API
- WebPack
- Jest
- Git
- Figma

## SOFT SKILLS

- Communication
- Teamwork
- High interest in development
- Responsible approach to tasks
- High self-organization

## LANGUAGE

- English A2 (in progress)

## EDUCATION

### TEACH ME SKILLS,22

Frontend Developer

### VITEBSK STATE MEDICAL UNIVERSITY,16

Pharmacist

## EXPERIENCE

### FRONTEND DEVELOPER (Graduate)

Teach Me Skills

### SKILLS

- application design and development
- study of technical documentation
- team work(was a team lead and organized the work within the team) and independently
- code review
- experience connecting the application to the back-end API
- experience writing unit tests

### RESULTS

During the training, several projects were implemented using various technologies.

### TASTY

This is an application that was presented as a graduation project.

This is an application that allows you to find not only a wide variety of culinary recipes, but also arrange instant delivery of products from the list of ingredients.

In the development process, I used the following technologies:  
HTML/CSS/JavaScript/TypeScript/React/Redux/Redux-thunk/React-router-dom/Notifications.

The project can be viewed at the link:[\*\*https://sashapilevich.github.io/tasty\*\*](https://sashapilevich.github.io/tasty)

### ✓ **PINTEREST(clone)**

This application allows you to find beautiful photos on various topics, as well as create your own collections with selected photos.

In the development process, I used the following technologies:  
HTML/CSS/JavaScript/Masonry.

The project can be viewed at the link:

[\*\*https://sashapilevich.github.io/Clone-Pinterest-JS/src/\*\*](https://sashapilevich.github.io/Clone-Pinterest-JS/src/)

### ✓ **AXIT(landing page)**

This is a simple landing page with adaptive layout for different devices.

In the development process, I used the following technologies:  
HTML/CSS/SASS/JavaScript

The project can be viewed at the link:

[\*\*https://sashapilevich.github.io/Landing-page-AXIT\*\*](https://sashapilevich.github.io/Landing-page-AXIT)

### ✓ **MOGO(landing page)**

This is a simple landing page with adaptive layout for different devices.

In the development process, I used the following technologies:  
HTML/CSS/JavaScript/JQuery

The project can be viewed at the link:

[\*\*https://sashapilevich.github.io/MOGO-Landing-page/src/\*\*](https://sashapilevich.github.io/MOGO-Landing-page/src/)

## **PHARMACIST,16-20**

### **RESULTS**

While working as a pharmacist in a pharmacy:

- increased sales of medicines and pharmacy products
- increased the average sales receipt with the help of additional sales, and thereby increased the premium
- thanks to a polite and caring attitude towards patients, increased the number of regular customers of the pharmacy
- letters of thanks were received from patients
- improved my qualifications by passing the exam for the second category
- promoted to Pharmacy Manager
